Furesoro 34

ESPECIALLY DESIGNED FOR THE DOMESTIC MARKET

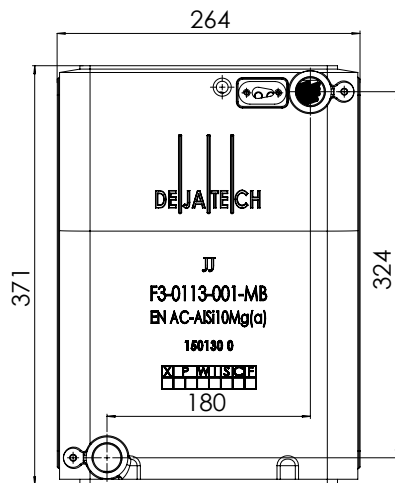

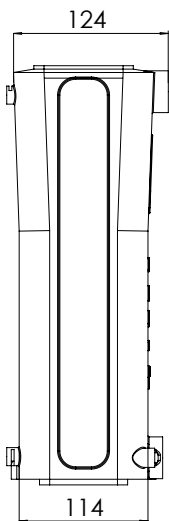

Furesoro 34

ESPECIALLY DESIGNED FOR THE DOMESTIC MARKET

Especially designed for the domestic market. Compared to similar products on the market, the Furesoro 34 is a heat exchanger with a fully water cooled combustion chamber and has a serial waterflow. These two features in combination with its robust design make it the most reliable aluminium heat exchanger on the market.

Benefits

- Compact esthetic design.
- Serial waterflow.
- Low hydraulic pressure drop.
- High modulation range possible.
- Low pneumatic resistance.
- High quality/price ratio.
- Robust reliable design based on 30 years of developing experience.
- Combustion chamber fully water cooled, no refractories needed.
- Worgas burner inside.
